PROFESSIONAL SUMMARY

Software Development Engineer (SDE) with core expertise in full-stack system architecture, scalable microservices, and AI workflow integration. Proficient in Data Structures & Algorithms (DSA), MERN stack development, Python, and TypeScript. Hands-on experience in engineering low-latency APIs, implementing Redis caching solutions, and deploying cloud-native applications. Strong background in object-oriented programming, system optimization, and writing clean, maintainable code for production environments.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), C++, TypeScript, C, HTML5, CSS3

Full Stack & Frameworks: React.js, Node.js, Express.js, Redux, Tailwind CSS, Component Architecture

AI/ML & Emerging Tech: LLM Integration (Groq API), Prompt Engineering, Vector Databases, Artificial Intelligence

Databases & Caching: MongoDB, MySQL, Redis, Indexing, Database Normalization

Backend & Core Concepts: Data Structures & Algorithms (DSA), OOP, RESTful APIs, Microservices, JWT, Web Security

Tools & DevOps: Git, GitHub, Docker, Postman, Vercel, Render, VS Code

EXPERIENCE

- ENSINO Research and Development Pvt. Ltd.** June 2026 – Present
MERN Stack Developer Intern Remote
 - Engineered** scalable full-stack features using React.js and Node.js, decreasing client-side render times by 15% across high-volume sessions.
 - Architected** and deployed 10+ secure RESTful API endpoints integrated with MongoDB, utilizing database indexing to speed up data queries by 25%.
 - Collaborated** in Agile engineering sprints, performing code reviews and maintaining 98% service uptime across microservices.

PROJECTS

- AI Cold Email Generator** | [Live Demo](#) Python, Node.js, Express.js, React.js, Groq LLM, Redis, JWT
Software Development Engineer
 - Developed** an AI-driven MERN application leveraging Groq LLM API to generate customized outreach emails in under 3 seconds.
 - Implemented** robust security protocols using JWT authentication, OTP verification, and RBAC across 20+ protected API endpoints.
 - Integrated** Redis caching layer to store repeated prompt responses, reducing external LLM API query costs by 35%.
 - Deployed** microservices across Vercel and Render, optimizing database connection pooling and reducing backend latency by 30%.
- E-Commerce Web Application** | [Live Demo](#) React.js, Node.js, Express.js, MongoDB, Razorpay, Tailwind CSS
Software Development Engineer
 - Engineered** a high-performance MERN e-commerce application supporting a 500+ item catalog with real-time state management.
 - Constructed** 15+ RESTful APIs for shopping cart persistence, product search filtering, and transactional workflows.
 - Integrated** Razorpay payment processing for 100+ simulated live transactions, increasing user checkout conversion by 40%.
- Interactive Developer Portfolio** | [Live Demo](#) React.js, Tailwind CSS, Render
Frontend Engineer
 - Designed** a responsive developer portfolio using React.js and Tailwind CSS, achieving a 95+ Lighthouse performance rating.
 - Built** modular UI components and automated CI/CD pipelines via Render for continuous integration.

EDUCATION

- Shri Ram Murti College of Engineering and Technology** Sep 2023 – Present
Bachelor of Technology in Computer Science & Engineering Bareilly, UP
- Kendriya Vidyalaya N.E.R** April 2022 – March 2023
Senior Secondary (Class XII) – Science (PCM) Bareilly, UP

CERTIFICATIONS

- Generative AI Mastermind** – LLM Architecture & Prompt Engineering ([Credential](#))
- Backend Development and API Creation** – Coursera ([Credential](#))
- Software Engineering Simulation** – Software Design & API Architecture ([Credential](#))
