PROFESSIONAL SUMMARY

Full Stack (MERN) Developer skilled in React.js, Next.js, Node.js, Express.js, and MongoDB with experience developing scalable web applications, RESTful APIs, and responsive user interfaces. Proficient in authentication, database management, cross-platform optimization, and cloud deployment using Vercel and Render.

EDUCATION

- **Shri Ram Murti College Of Engineering And Technology**
Bachelor of Technology in Computer Science Bareilly, UP Sep 2023 - Present
- **Kendriya Vidyalaya N.E.R, Bareilly**
Intermediate, PCM April 2022 - March 2023
- **Kendriya Vidyalaya N.E.R, Bareilly**
High School April 2020 - March 2021

PROGRAMMING SKILLS

- **Languages:** Python, C++, JavaScript, C, HTML, CSS
- **Frontend:** React.js, Tailwind CSS, Responsive UI
- **Backend :** Express.js, Node.js, REST API Development
- **Database:** MongoDB, MySQL
- **Developer Tools :** VS Code, Git, GitHub, Docker
- **Concepts:** Authentication, RESTful APIs, Deployment

EXPERIENCE

- **TechnoHacks Solutions Pvt. Ltd. – Full Stack Development Intern** May 2026
 - Developed frontend and backend web application features.
 - Worked with modern web technologies and REST APIs.
 - Collaborated on project development following software engineering best practices.

PROJECTS

- **AI Cold Email Generator (Live Link)**
 - Built a Full Stack MERN AI-powered email generator that created personalized cold emails in under 5 seconds.
 - Implemented JWT authentication, OTP verification, and protected 20+ API endpoints to ensure secure user access.
 - Integrated AI services to automate email generation, producing 100+ personalized email drafts during testing.
 - Deployed the application on Vercel and Render, optimizing APIs and database to improve response time by 30
- **Portfolio Website (Live Link)**
 - Designed and developed a responsive portfolio website using React.js and Tailwind CSS.
 - Implemented reusable UI components and deployed the application on Render for optimized performance.
- **E-Commerce Web Application (Live Link)**
 - Developed a MERN-based E-Commerce platform supporting 500+ products with JWT authentication and role-based access control.
 - Built product catalog, shopping cart, search, and order modules using 15+ RESTful APIs for seamless operations.
 - Integrated Razorpay payments and designed a responsive UI, processing 100+ test transactions while improving product discovery by 40%.

CERTIFICATIONS

- **Software Engineering Job Simulation:** Show Credentials
- **Generative AI Mastermind (OUTSKILL):** Show Credentials
- **Backend Development and API Creation (Coursera):** Show Credentials

LEADERSHIP EXPERIENCE

- Led a team of 4 members to build a Full Stack (MERN) Logistics Management System.
- Managed decoration and event setup for the college fest “Zest”.
